

End of Software support for SYSTIMAX® 360 imVision® Controller

CommScope will discontinue software support for SYSTIMAX imVision 360 Controller.

CommScope's imVision system, originally launched as iPatch in 2001, has evolved significantly through multiple iterations of iPatch/imVision Manager devices. Each was designed to enhance CommScope's Automated Infrastructure Management (AIM) system. Legacy devices, such as iPatch Rack Manager Plus, iPatch Panel Manager, and imVision 360 Controller have since been replaced by the more advanced and technologically superior imVision Controller X. Although the legacy imVision Managers reached end-of-life status several years ago (as outlined in the table below), CommScope continued to support them within the System Manager software.

CommScope previously announced that, effective at the end of 2025, the System Manager software will no longer support previously discontinued iPatch Rack Manager Plus and iPatch Panel Manager devices, and customers were advised to migrate their installations to the imVision Controller X.

CommScope has now confirmed that software support for the SYSTIMAX imVision 360 Controller will also end in October 2026. CommScope's decision to discontinue software support for the older legacy devices means that their compatibility will no longer be tested with new versions of the System Manager software. This move is driven by the need to streamline operations and focus on more advanced, efficient technologies that can better meet the evolving demands of network infrastructure.

The imVision Controller X represents the latest in technology, offering enhanced features, improved performance, and greater scalability. By migrating to this newer technology, customers will benefit from a more robust, future-proof solution that aligns with the latest industry standards and practices. This transition reflects CommScope's commitment to innovation and is designed to help customers receive high quality service and support for their investment.

List of imVision Managers that are / will no longer be supported by the System Manager software:

Name	MID	Description	Year Discontinued	Support End Date
iP-Rack- MGR	108666017	iPatch Rack Manager	2005	
iP-Rack-MGR-Plus	760024588	iPatch Rack Manager Plus	2010	
360-iP-PANEL-MGR	760095562	SYSTIMAX 360 iPatch Panel Manager	2015	
360-iP-NET-MGR-MOD	760105353	SYSTIMAX 360 iPatch Network Manager	2015	
360-imV-CNTRLR	760161380	SYSTIMAX 360 imVision Controller	2019	October 2026
